

NOBIN NEPOLIAN

iOS Developer

Dubai, UAE | +971 509524569 | nobinnepolian987@gmail.com | linkedin.com/in/nobin-nepolian | https://github.com/NobinNepolian

SUMMARY

Driven iOS Developer with 4 years of experience building high-performance, secure iOS and cross-platform applications. Proficient in Swift, React Native, and JavaScript/TypeScript, with deep expertise in SwiftUI, UIKit, and integrating Web3/crypto wallet solutions. Skilled at optimizing app performance, ensuring scalability, and implementing robust security protocols like biometric authentication, secure storage, and cryptographic key management. A proactive team player who excels in Agile environments, collaborates across disciplines, and stays current with mobile development trends and best practices.

TECHNICAL SKILLS

Programming Languages: Swift, Objective-C, JavaScript/TypeScript, C++, C, HTML, CSS

Architecture & Patterns: MVVM, MVVM-C (Coordinator), VIPER, Clean Architecture, SOLID Principles, Dependency Injection, Agile/Scrum, Code Review, Cross-functional Collaboration

UI Frameworks: SwiftUI, UIKit, Core Animation, Human Interface Guidelines (HIG), React Native

Core Frameworks & Async: Combine, Swift Concurrency (async/await), Grand Central Dispatch (GCD), AVFoundation

Blockchain & Mobile Security: WalletConnect v2 (Reown), BIP-39 Mnemonic, Multi-Chain Wallets (Ethereum, BSC, Polygon, Base, Tron, Solana, Bitcoin), Transaction Signing, CryptoKit, CommonCrypto, Secure Enclave, PBKDF2, SSL Pinning, iOS Keychain, LocalAuthentication, Biometric Authentication (FaceID/TouchID)

Data & Databases: Core Data, SwiftData, Realm, SQLite, UserDefaults, MongoDB

Networking & Communication: URLSession, RESTful APIs, Alamofire, JSON, WebSockets (Socket.io), VoIP, Chat Integration

SDKs & Feature Integrations: Apple Push Notification service (APNs), Deep Linking, In-App Purchases (IAP), CoreLocation/Maps, HealthKit, Stripe, QR Scanning, Localization

Testing & Performance: XCTest Framework, Unit Testing, UI Testing, Mocking, Performance Profiling, Test-Driven Development (TDD)

Tools, CI/CD & Release: Xcode, VSCode, Git, GitHub, GitLab, Fastlane, GitHub Actions, Jenkins, Firebase, App Store Connect, TestFlight, Firebase App Distribution, CocoaPods, Swift Package Manager (SPM), Jira

PROFESSIONAL EXPERIENCE

iOS Mobile Engineer | Token 13 L.L.C

July 2025 - Present (Dubai, UAE)

- Architected and developed a comprehensive cryptocurrency wallet application from scratch, enabling real-time market tracking and secure asset transfers.
- Built an intuitive in-app Crypto Swap feature utilizing decentralized exchange (DEX) APIs, optimizing transaction routing for faster token conversion.
- Implemented local AES encryption for private key storage and integrated biometric authentication (FaceID/TouchID) to secure all sensitive operations.
- Integrated WalletConnect v2 to facilitate web3 connectivity, empowering users to securely link their wallets to external dApps and execute remote transactions.
- Monitored app health post-deployment, maintaining a 99.9% crash-free rate through active optimization and debugging.

Software Engineer | Armia Systems

August 2024 - April 2025 (Kochi, Kerala)

- Conducted extensive R&D to integrate cutting-edge technologies into projects, including React Native for cross-platform solutions.
- Led the development of an iOS application from the ground up, integrating various libraries and SDKs, and successfully releasing it on the App Store.

- Actively involved in optimizing code for better performance and ensuring the applications adhered to best practices in iOS and React Native development.

Junior Software Engineer | Armia Systems

February 2023 - August 2024 (Kochi, Kerala)

- Assisted in developing and maintaining iOS applications, contributing to feature enhancements and bug fixes.
- Collaborated with cross-functional teams to deliver projects on time and align with client requirements.

Junior Software Engineer Trainee | Armia Systems

August 2022 - February 2023 (Kochi, Kerala)

- Gained hands-on experience in iOS development, focusing on Swift and Xcode.
- Contributed to the testing and debugging of iOS applications, ensuring smooth functionality.
- Actively supported senior developers in the implementation of key features and maintenance tasks.

PROJECTS

TokenB (Crypto Wallet Application) – iOS App

July 2025 - Present | SwiftUI, Swift

- Developed a comprehensive iOS cryptocurrency wallet, TokenB, from scratch, enabling users to track market trends, manage assets, and securely send/receive transactions.
- Engineered an in-app Crypto Swap feature and integrated the WalletConnect v2 protocol, allowing users to seamlessly interact with external decentralized applications (dApps).
- Secured user assets through AES data encryption and integrated biometric (FaceID/TouchID) transaction authorization.

Rags2Riches – iOS App

May 2024 - April 2025 | Cocoa Touch, Swift

- Developed an iOS application, Rags2Riches, from scratch, enabling users to upload ideas and participate in contests.
- Implemented API integration using Alamofire, AWS, Branch 10, Socket and other services for seamless functionality.
- Implemented unit testing with XCTest Framework, and performed comprehensive bug fixes for enhanced stability.

TaskRabbitClone – iOS, Android App

March 2024 - April 2024 | React Native

- Developed a React Native application, 'TaskRabbitClone', from the ground up, enabling users to seamlessly discover and hire services across various categories.
- Optimized component rendering and state management, resulting in smoother transitions and reduced memory overhead.

MultiCart – iOS App

January 2024 - March 2024 | Cocoa Touch, Swift

- Revamped approximately 10% of the user interface for the MultiCart Buyer and Seller app.
- Contributed to upgrading the SDK, enhancing its functionality and performance.

ShowReel/B Cubed – iOS App

January 2023 - December 2023 | Cocoa Touch, Swift

- Contributed to completing 50% of the ShowReel App's UI and functionality.
- Assisted in bug fixes to enhance functionality and stability.

Shelter – iOS App

September 2022 - December 2022 | Cocoa Touch, Swift

- Developed the iOS application "Shelter" from the ground up, enabling users to effortlessly upload photos and property details for sale while also providing a robust search feature for property exploration.

EDUCATION

Master of Computer Applications

April 2020 - March 2022

Kristu Jyoti College of Management and Technology, MG University (Kottayam, Kerala)

Bachelor of Computer Applications

August 2017 - March 2020

University Institute of Technology, Kerala University (Kottarakkara, Kerala)
